

SALAH ELHINT

Full-Stack Developer. Software Engineer

I am a Full-Stack Developer who loves building complete web, mobile, and SaaS applications. I handle the whole process from creating secure back-end systems to building beautiful front-end interfaces and plugging in AI automations to save time. I am highly adaptable, work great independently or with remote teams, and have a proven track record with clients across Morocco, France, and Canada. Fluent in English, French, Arabic, and Berber.
