SALAH ELHINT

Lead Developer | Full-Stack Engineer
Casablanca Metropolitan Area

Summary

I am a Lead Full-Stack Engineer who builds and scales comprehensive digital ecosystems. From the initial concept to the final launch, I take absolute end-to-end ownership of complex SaaS platforms, enterprise web systems, and mobile applications. My focus is on engineering highly scalable, high-performance solutions that effectively support and drive business growth. + System Architecture: Designing robust multi-tenant SaaS infrastructures, engineering complex databases, and seamlessly integrating services for maximum stability and scalability. + Backend Development: Laravel, PHP, Python, custom RESTful API development, and cross-system integrations. + Frontend Development: React.js, Next.js, Vue.js, Angular, and Tailwind CSS. + Mobile Development: React Native (Expo) and Capacitor. + DevOps & Infrastructure: Cloud deployments, advanced server management, performance optimization, strict security protocols, and ensuring high availability. + Data Engineering & Analytics: Automated web scraping, data analysis, and building comprehensive tracking systems to monitor user behavior and support data-driven decision-making. From architecting custom ERP systems to deploying high-performance cloud environments, I have a proven track record of delivering flawless web and mobile applications. I specialize in bridging the gap between complex technical challenges and clean, stable, and scalable execution.

Experience

CyberScale
Développeur Full Stack
March 2025 - Present (1 year 4 months)
France

Acted as a core Full Stack Developer, taking complete ownership of multiple web, mobile, and SaaS applications from concept to deployment. Successfully

delivered high-impact projects including Klaid, ZemExpress, Wifina, and Isovea, managing direct client communications to ensure technical solutions strictly aligned with business goals.

Explore project case studies: <https://www.cyber-scale.me/etudes-de-cas>

- **Architecture & End-to-End Development:** Architected scalable frontend and backend systems for multi-tenant SaaS, web, and mobile platforms. Orchestrated services, managed data pipelines, and built infrastructures designed for future growth.
- **Database & Analytics:** Engineered highly efficient database structures and optimized complex queries to guarantee system stability. Built comprehensive tracking systems to analyze user behavior and drive data-informed product improvements.
- **Client Management & Product Ownership:** Held full technical responsibility across the project lifecycle. Conducted direct technical consultations to translate client business requirements into powerful, actionable digital solutions.
- **Mobile Engineering & APIs:** Built and integrated robust backend APIs with mobile applications, ensuring seamless, real-time data flow and high stability across interconnected platforms.
- **UI/UX Implementation:** Developed modern, intuitive user interfaces, prioritizing clean aesthetics and frictionless user journeys for a highly optimized cross-device experience.
- **DevOps & Cloud Deployment:** Managed the complete deployment lifecycle. Configured server infrastructures and production environments to ensure absolute security, high availability, and continuous scalability.

AlloClients

Lead Developer (Acting CTO)

October 2025 - Present (9 months)

France

Served as Lead Developer and Acting Chief Technology Officer (CTO), spearheading the complete design and development of the AlloClients technical ecosystem. Architected an integrated digital platform that seamlessly connects a high-traffic public booking directory with a specialized SaaS management application for independent therapists.

Explore the AlloClients ecosystem:

- **Public Directory:** <https://allo-therapeute.fr>

- Marketing Platform: <https://allo-clients.com>
- SaaS Application: <https://app.allo-clients.com>

- Designed and developed a multi-tenant SaaS system architecture that connects the booking platform with the practitioner management dashboard, ensuring seamless data synchronization.
- Developed the complete frontend and backend (Full-Stack), engineering the core business logic for appointment handling and data management.
- Created an automated appointment scheduling system and optimized the overall data flow within the application.
- Configured and optimized the cloud infrastructure and deployment pipelines (DevOps), managing servers, databases, and system security.
- Built a core data analytics system to track platform usage, analyze user behavior, and improve overall system performance.
- Contributed to key technical decision-making regarding system architecture, user experience (UX), and API integrations

Numa

Senior Full-Stack Engineer & System Architect

October 2024 - September 2025 (1 year)

Designed, architected, and single-handedly developed Numa ERP, a massive, highly competitive SaaS ERP platform tailored for enterprise management. As the sole engineer, I took absolute ownership of the entire product lifecycle from UI/UX conceptualization to complex database design, full-stack programming, and cloud deployment.

- **Massive Database Architecture:** Designed a complex, scalable database with over 140 tables to support intricate business logic and robust multi-tenant SaaS capabilities.
- **End-to-End UI/UX & Frontend:** Designed every screen and user flow. Built a dynamic, responsive frontend using React.js, ensuring lightning-fast navigation for enterprise operations.
- **High-Performance Backend:** Programmed a secure API and backend using Laravel, engineered to handle heavy data processing and complex relational queries.
- **Comprehensive Enterprise Modules:** Built a massive suite of interconnected modules from scratch:
- **Finance & Operations:** Complete management of Sales, Purchases, and Treasury (transactions, checks).

- Advanced Stock Control: Real-time inventory tracking with multi-warehouse movements.
- CRM & Pipeline: End-to-end customer management, accounts, projects, quotations, and invoicing.
- Human Resources: HR suite covering employee data, attendance, payroll, expenses, and advances.
- Admin, Security & Analytics: Developed a granular Role-Based Access Control (RBAC) system, dynamic dashboards with deep analytics, and customizable document styling.
- DevOps & Deployment: Managed the full deployment pipeline, optimizing server architecture for high availability and continuous scalability.

Archipel Digital

Frontend Web Developer

April 2024 - September 2024 (6 months)

Casablanca-Settat, Morocco

- Developing dynamic frontends using Angular and Vue.js, ensuring robust performance and seamless user experience.
- Integrating APIs and managing data flow between the frontend and backend, optimizing system architecture for scalability and efficiency.
- Working with Strapi to build and integrate content management systems (CMS) with the frontend, ensuring smooth API communication and data handling.
- Converting designs from PSD, XD, and Figma into pixel-perfect, responsive code that adheres to modern web standards.
- Leveraging CSS frameworks like Tailwind and Bootstrap to accelerate development while maintaining consistency and responsiveness across the platform.
- Writing efficient, maintainable, and scalable styles using SCSS, ensuring that the codebase remains clean and easy to extend.
- Fixing styling bugs and enhancing UI components in Angular projects, improving the overall user experience.
- Implementing best practices for web performance, accessibility, and SEO to ensure the highest quality of web solutions.
- Collaborating with designers and developers to create intuitive and engaging user interfaces, leveraging Tailwind and Bootstrap for responsive and consistent designs, and ensuring a seamless and enjoyable user experience.

InfiniPrint

Web Developer

February 2024 - March 2024 (2 months)

Casablanca-Settat, Morocco

Worked as a Web Developer at InfiniPrint, focusing on website development and maintenance. Responsibilities included developing and enhancing the company's web presence, setting up products, and ensuring the seamless functioning of the website. A significant part of the work involved using WordPress to create, customize, and manage website content. Additionally, collaborated with cross-functional teams to deliver high-quality web solutions.

Origin Control

Mobile Application Developer

December 2023 - January 2024 (2 months)

Canada

- + Designed and developed an innovative mobile application using React Native Expo, enabling seamless connectivity with machines.
- + Implemented features that allow users to display and control these machines through a dedicated server, ensuring efficient and effective management.
- + Demonstrated the ability to integrate complex functionalities, ensuring a smooth user experience while maintaining precise control over connected machines.

FPM

Data Specialist

September 2023 - November 2023 (3 months)

Casablanca-Settat, Morocco

- + Executed automated web scraping operations across diverse sources to efficiently extract, structure, and deliver actionable information.
- + Managed and refined complex datasets, enforcing strict standards of data accuracy, integrity, and reliability across internal systems.
- + Optimized core data management workflows by systematically processing and manipulating raw data to drive overall operational efficiency.

Origin Control

Development Intern

April 2023 - May 2023 (2 months)

Quebec, Canada

- + Designed and developed a robust desktop application for real-time data acquisition utilizing Python and the wxPython framework.
- + Engineered an efficient data processing pipeline to systematically collect, parse, and visualize live data streams from various hardware sensors.

+ Collaborated with the core engineering team to design intuitive user interfaces, optimize software architecture, and streamline complex data handling workflows.

Education

Université Hassan II de Casablanca

Licence Professionnelle, Développement informatique · (October 2023 - June 2024)

Specialized Institute Of Applied Technology NTIC

Technicien Spécialisé, Développement Informatique option Web Full Stack. · (2021 - 2023)

high school Ben M'Sick

· (September 2020 - July 2021)
